

GREEN IT UP!

NMC has a grant for a sustainable **bench & planter** for our planned community garden.

YOU could start a great career in engineering by designing this for the school.

DESIGN RULES:

COST: We have **\$750** for the project, including all materials, so cost out your materials carefully.

SUSTAINABILITY: Materials must be environmentally friendly and low-to-no-maintenance.
Look at options in Recovered, Rehabilitated, Recycled, Reused, or Sustainably Harvested materials.

WHO'S ELIGIBLE? Everyone at NMC! Staff & Students!

HOW DO I ENTER? Draw up your plan. Make a materials list, including **WHERE** you would get them, **HOW MUCH** they cost, and **WHY** they are sustainable. Submit your proposal to Mr. Harkness by **FEBRUARY 28**.

WHERE WILL IT GO? Right here.
